## Reconstructive Surgery

### Acıbadem Taksim Hospital, İstanbul, Türkiye

Private Practice (Self Employe)

#### Detailed Scope of Work

In the beginning of surgical career I was extensively involved in Hand surgery and Microsurgery.

In 2010 a was one of four surgeons whom performed the worlds third full face transplantation and world first quadruple transfer.

In last three years I have diverted from reconstructive surgery to cosmetic surgery. I practice medical tourism and do various surgeries including a diversity of cosmetic procedures.

In the following two years I have focused on Facial paralysis treatment and have evolved a new technique regarding facial reanimation with the Extensor Halucis Brevis Extensor Digitorum Brevis Muscle Transfer.

I also have been interested in "Lymphedema" surgery and perform the three level multiple vascularized lymph node transfers to the lower extremities.

I have been also involved in regenerative medicine, in regarding StromalVascular Fraction, FAT banking, Facial rejuvenation as well as wound healing.

My latest scope is regarding my new method for breast lifting and reduction called the Twirl-Internal Bra technique.

In 2011, I was one of the four surgeons whom performed The Worlds Third Full Face Transplantation & The World First Four Extremity transplantation held in The University of Hacettepe.

Between 2014 and 2016, I performed 85 hepatic artery anastomosis as member of the liver transplant team of The university of Acıbadem, İstanbul.

In June 2022, I led a novel Turkish surgical team and was successful to separate a lovely Algerian twin after a 9- hour operation and was considered as a world record for separating a Thoraco-Omphalopagus conjoined twins. I was able to employ revolutionary techniques from 3D modelling to regenerative medicine principles that contributed to the successful separation. As a microlever, till the date I devoted to give literally hundreds of presentations at meetings all over the globe and been invited as a keynote speaker in important internationally organized microsurgery meetings.

#### Awards & Media

2012 The participation as team member in the "Worlds Third Full FACE TRANSPLATATION" as well The First Quadralupe Transplation held in Hacettepe University , Ankara

2014 Popularizing the free Extensor digitorum Brevis Extensor halucis Brevis Muscle functional transfer for facial paralysis treatment.

2016 Best Experimental Paper Award-Generation of skin Tissue using adipose Tissue-Derived stem cells

2017 Awarded the best scientific paper in plastic surgery for June 2017.

Popularizing the multi-level Free Vascularized Lymph Node Transfer for Lymphedema Treatment2022 A team of surgeons leaded by Professor. Karaaltin, at a Turkish hospital has successfully separated conjoined twins in under nine hours using 3D technology-- breaking the world record for the fastest-ever operation of its kind.

2024 Awarded the Caplan Prize at the 47th Congress of the European Society of Lymphology in June 2024.

#### Research Projects

1) Generation of bone tissue using adipose tissue-derived stem cells: Experimental Model

Emre Gönenç BAYGOL

Mehmet Veli KARAALTIN Fellow of EBOPRAS

Halil İbrahim CANTER Fellow of EBOPRAS

Kahraman OZTURK

Ercüment OVALI

Mustafa Aykut OZPUR

Ethem GUNEREN Fellow of EBOPRAS

2) Investigating The Effecacy of Adiposed Derived Expanded Mesenchymal Stem Cells for Creating Bone Tissue In-vitro : In A Human Model

Korean Society of Plastic and Reconstructive Surgeons
